

Learn To Give

Blood Bank Thrives Only Through Donations

By SALLY TURNBULL, Kernel Staff Writer

Why did you come to college? You came to gain knowledge; to enjoy the social life; and mainly, to prepare yourself for the future. All this is doing a personal service for yourself and for others. One of the most important phases of growth is learning to give.

To the people at the University Medical Center Blood Bank, giving is a part of their daily lives. Blood cannot be manufactured; it must be given.

The Med Center Blood Bank does not buy blood. A donor has three choices when he gives. He can donate for a specific patient; he can accumulate a blood credit for himself in the future; or he can donate it under the condition that a sum of money will be given to some religious, social, or charitable organization acceptable to the blood bank.

In order to donate, a person should be between 21 and 59 years of age. Students under 21 years and not married require the written permission of a parent or guardian.

Some of the blood donated goes to special problems associated with leukemia, hemophilia, and other diseases. However, the main portion goes to patients undergoing open heart surgery.

Open heart surgery is an exceedingly complex operation. It involves the efforts of a great number of people and much material and equipment.

This operation means bypassing the heart in such a way that the function of the heart must be taken over by a pump which sends out fresh blood.

The University Hospital on the average performs two open heart surgeries a week.

The most vital thing that determines whether surgery can be carried out is having enough fresh type

specific blood on hand. The blood must be donated 12 to 24 hours prior to the operation with 6 to 12 units usually required.

The blood bank is a blood storage depot for the University Hospital. If blood is not donated for a particular patient, it must be borrowed from blood which has been deposited in the Bank for other patients.

Many patients live some distance away and are unable to get friends and relatives to donate for them. This is why local donors are necessary.

Recently there have been several campus organizations who have become donors; and a few have contributed the blood for an entire operation.

Practically all the organizations in the Interfaith Council are participating in this program in addition to some of the fraternities.

Phi Sigma Kappa, Alpha Gamma Rho, Sigma Nu, and Lambda Chi Alpha are now on call whenever an operation is scheduled and their assistance is needed.

Tom Scott Wins Phi Tau Award

A 1962 University graduate, Tom Scott, will be honored tonight at a banquet as the recipient of the National Shideler Award.

The award is given to the most outstanding 1962 Phi Kappa Tau graduate in the nation.

Tom was selected for the honor at the Phi Kappa Tau national convention in Asheville, North Carolina last June.

Scott, a native of Ludlow, graduated in electrical engineering with a 2.8 overall standing. He was president of Phi Kappa Tau fraternity, president of the Interfraternity Council, Lamp and Cross, senior men's honorary, Keys, sophomore men's honorary,

and vice-president of Lances, junior men's honorary.

Scott was also a member of Omicron Delta Kappa, national leadership and scholarship honorary, Eta Kappa Nu, electrical engineering honorary, and served on the Little Kentucky Derby, Homecoming and Greek Week committees.

Shideler is presented for participation in fraternity activities, scholarship and campus achievement, and personal qualities which indicate outstanding leadership ability. It is the first time a UK graduate has received this award.

The award certificate will be presented to Scott at the banquet which will take place in the Student Union Football Room beginning at 6 p.m.

A reception will be held at the University Phi Kappa Tau chapter house following the banquet. There will be an unveiling of a picture honoring Scott at this time.

Joseph Dunker from Cincinnati, will be the main speaker at the banquet.

Tom is presently doing graduate work in business administration at Harvard University.

TOM SCOTT

Nominations For SC Slated For Tonight

Nominations for the executive officers for the 1963-64 Student Congress will be held at 7 p.m. today in the court room of the Law Building.

It will be possible for any student to make nominations from

Dr. Hotchkiss To Lecture At Guignol

In recognition of being selected as the "Distinguished Professor of the Year" by the Arts and Sciences faculty, Dr. Margaret Hotchkiss will lecture at 8 p.m. tonight in the Guignol Theatre.

Dr. Hotchkiss, professor of microbiology, is the 19th member of the Arts and Sciences faculty to have received such an award.

The title of her lecture, "To Add a Cubit," will be based on her research in bacteriology.

Dr. Hotchkiss, who received her doctorate at Yale University, taught at the New York Medical College before joining the UK faculty in 1945.

An informal reception will follow in the music lounge of the Fine Arts Building after the lecture.

250 Women Honored At Stars In The Night

More than 250 University women were recognized for outstanding leadership and scholarship at Stars in the Night last night.

The Kappa Kappa Gamma Patty Berryman Award for the Outstanding Unaffiliated Upper-class Woman went to Elizabeth Jane Withers of Hardinsburg.

The Delta Zeta Outstanding Woman of the Year silver bowl was awarded to Dixie Evans, di-

CAROL HARPER

rector of women's residence halls.

Lynn Wagner of Cincinnati, Ohio was presented the Pi Beta Phi Alumnae Club Award as the outstanding unaffiliated freshman woman.

Mortar Board Senior Service Awards were given to Carol Anne Harper, Madisonville, and Suzanne Pitzer, Louisville.

Women tapped for membership in Mortar Board, senior women's leadership and service honorary, were: Mildred Ann Combs, Hazard; Carole Lynne Cosby, Cincinnati, Ohio; Sue Ellen Grannis, Aberdeen, Ohio; Martha Greenwood, Hopkinsville; Rebecca Grover, Erlanger; Gail Houston, Murray; Edith Justice, Pikeville; Mary Kathryn Layne, Winchester; Mary Dale McIver, Columbia, Tenn.

The only restrictions placed on campaigning this year by the elections chairman are that there will be no campaigning within the confines of or on the steps of the Student Union Building or the Journalism Building, the two designated voting places.

Other honors announced at the program include:

Ann Gordon Evans, Lexington, received the Alpha Lambda Delta Senior Book Award. Senior Certificates were presented to Virginia Rapp Barrett, Lexington; Joyce Wilson Carey, Lexington; Carolyn Hope Dunn, Lexington; Barbara Kaye Hutton, Louisville; Carolyn Helt, Lexington; Linda Sue Hoffman, Lexington; Bernice Huey Hopkins, Lexington; Reatha Ann Lewis, Lexington; Saundra Sue Little, Ashland; Linda McDowell Mayor, Lexington; Vanda Marcum, Lexington; Janice Joy Mitts, Sherman; Mary Sue Pollock, South Bend, Ind.; Carolyn Reid, Owensboro, and Elizabeth Anne Wright, Brea, Calif.

ALPHA LAMBDA DELTA. Presentation of New Members: Kathleen Adams, Grayson; Gloria Bailey, Harrodsburg; Vicki Beekman, West Paducah; Edna Elizabeth Clark, Paducah; Nancy Louise Coleman, Lexington; Janet Denick, Lexington; Patricia Devuono, Louisville; Martha Eades, Lexington.

Martha Johnson, Louisville; Sally King, Lexington; Mary Sue Kohrman, Florence; Elizabeth Pettit, Princeton; Veronica Rough, Newton, Pa.; Una Marion Spencer, Scottsville; Sandra Sue Thompson, Lexington; Valerie Volhard, Brooklyn, N.Y.; Cynthia Weaver, Lexington.

Donna Lindsay, Dayton, Ohio; Mary McCormick, St. Albans, W. Va.; Margaret McCoy, Madison, Wisc.; Linda Mills, Avondale Estates, Ga.; Sarah List, Lexington; Linda Perkins, Hopkinsville; Pat Montgomery, Danville; Pam Bentley, Centerville, Ohio; Janet Stokes, Harrodsburg.

CWENS. Sophomore Women's Honor Society, Presentation of New Members: Janis Gwen Allen and Joyce Gail Allen, Ft. Richardson, Alaska; Suzanne Ballew, Keiv; Vicki Lynn Beekman, West Paducah; Barbara Sue Bloomquist, Jamestown, N.Y.; Betty Pillow Chambers, Nashville, Tenn.; Marilyn Anne Chapman, Ft. Thomas; Betsy Clark, Paducah.

Camilla Cofer, Louisville; Nancy Louise Coleman, Lexington; Donna Jeanne DeCostas, Coral Gables, Fla.; Martha Leine Eades, Lexington; Mary Lou Hicks, Augusta; Deanna Joyce Hopkins, Middleboro; Martha Ellen Johnson, Louisville; Diane Webb, Arlington, Va.

Barbara Jones, Cincinnati, Ohio; Kathleen Kerler, Owensboro; Sally Justine King, Lexington;

ington; Janet Kington, Madisonville; Sarah List, Lexington; Maxine Martin, Franklin; Mary Huff McCormick, St. Albans, W. Va.; Cheryl Miller, Louisville; Linda Alice Mills, Avondale Estates, Ga.; Christine Moser, Louisville; Peggy Pergrem, Lexington; Betty Pettit, Princeton; Cheaney Ringo, Lexington, and Lynn Wagner, Cincinnati, Ohio.

LINKS. Junior Women's Honor Society, Presentation of New Members: Anne Spencer Arnold, Lexington; Susan Virginia Bailey, Louisville; Lois Jean Baumgardner, Louisville; Julia Blyton, Lexington; Sandra Kay Brock, Newburgh, Ind.; Peggy Ann Carter, Cincinnati, Ohio; Thelma Cote, Louisville; Carolyn Cramer, Lexington; Debbie Gene Delaney, Louisville; Kathleen Mari Fitzgerald, Lexington.

Frances Fowler, Oak Ridge, Tenn.; Mary Garland Goodlett, Harrodsburg; Barbara Fugate Griggs, Gate City, Va.; Anna

SUZANNE PITZER

Trustees Meet

The internal budget will be the main topic of discussion of the Board of Trustees meeting at 1:30 p.m. today.

The Board will also consider the recommendations for honorary degrees and reports concerning the HHFA Housing Project for four fraternities.

The Board will also hear a report from the Hopkinsville Community College site selection committee and approve the establishment of the Department of Plant Pathology.

New Board Set Up By Student Union

A junior board has been established to carry out newly formulated programs in the Student Union Building.

Instead of one board there will be two Student Union Boards.

The senior board will evaluate and formulate new programs and act as a policy making organization for the Student Union Building.

The senior board is composed of three newly appointed members, Sharon Perkins, Glynda Stephens and John Stadler. The other three members have been reappointed from last year's board. They are John Repko, Edith Justice and Susan Scott.

The junior board will carry out the programs formulated by the senior board and will be composed of five committee chairmen

instead of six. The new committees are concerned with personnel, social activities, publicity, special events, and sub-topics.

This year's junior board was elected last Thursday in an all campus election. Newly elected members of the junior board are Roger May, Carolyn Cramer, Peggy Parsons, Glen Carpenter, Jack Peters, and Jack Reis.

The boards will hold a combined meeting twice a month, with a vice president of the senior board acting as chairman of the junior board.

Officers for each board will be elected in approximately three weeks.

13 Coeds Involved In Dorm Drinking

Thirteen freshmen coeds were involved in the buying, selling, and consuming of beer in Patterson Hall March 20.

The women who brought the beer into the dormitory have been asked by the Dean of Women's Office and the Women's Advisory Council to move out of the women's residence hall.

Miss Dixie Evans, director of women's residence halls, explained that the women are not being asked to leave the University. Several have decided to live in town with relatives. She said the coeds will be allowed to move back into the residence halls after an unspecified period of time.

Other women involved in the drinking episode have been placed on disciplinary probation

for a period of time commensurate with the degree of their involvement," according to a statement issued by Miss Evans.

"Disciplinary probation imposes no additional restrictions," she explained. "It simply means that the girl must be especially careful to adhere to all University policies, and any infraction previously considered minor would be considered serious."

The Women's Advisory Council reached the decision Thursday night. Each decision, Miss Evans said, was reached individually, based on the involvement of the woman and her responsibility to the University.

English Instructor Discusses Disarming Without Defeat

English instructor Edward Morin Thursday night told members of a YMCA discussion forum that "when enough guns are brought together, they will go off."

Speaking on "Disarmament Without Defeat," Morin declared, "We're not worried enough about disarmament."

The reasons for this, he said, are that people don't like to think about their death, government's minimizing the danger of nuclear war, and the idea that man always survives his weapons.

Many people say we will never use nuclear weapons, Morin stated. "But the occasion may well arise."

A nuclear holocaust could be set off by panic, accident, an accident interpreted as an attack, or by psychopaths in high defense positions, he said.

"Our civil defense has been keeping the public calm," he stated. "In doing so, they have hidden such facts as the effect of air blasts, which would make bomb or fallout shelters useless."

Morin outlined the history of disarmament and public reaction toward pacifist movements. Early in history, he said, it was "Un-Christian" to be against war. "Later, Tolstoy wrote of the in-

congruity between war and Christian morality, and condemned military conscription."

The Society of Friends, he continued, was the first group that preached direct resistance to war. He cited Ghandi and Bertrand Russell for their nonresistance views.

"The problem today, in seeking nuclear disarmament," Morin said, "is our idea that the diabolical enemy's acceptance of our proposals is worse than their refusing them. This is the devil image—that the enemy is super-humanly clever."

"We must create a bargaining mood. A tremendous amount of work is needed to create a negative attitude toward testing."

"There is a responsibility for everyone," he concluded. "We must have an understanding of these things, and fight the hostility to those telling of the dangers."

*Campus Serenade*

Lambda Chi Alpha spent part of its weekend festivities listening and joining in on some good folk-songs led by Neil Ellison. The Lambda Chi Viking

Party was held Saturday night at the chapter house and dancing, singing, and duel-type spectacles highlighted the evening.

*Conscientious Gamblers*

Sigma Alpha Epsilon fraternity went all out at the Casino Party held Saturday night at the chapter house. Besides authentic decorations from the heart of Las Vegas, they hosted such guests as the Four Preps and The All Star team. Needless to say, fun was had by all, especially by the swooning coeds.

The Senior Plight—Defend!

By NANCY LOUGHRIIDGE
Assistant Campus Editor

Seems like the spring's busting out all over theme has pretty well been run into the ground by now; but even so one plain old fact remains, spring is here. So, you say, this we already know. But mark, it is also that last nostalgic filled semester for many of our student types.

You can always tell a graduating senior. They have that sticky, sentimental, sloppy, I don't give a darn attitude. The boys do, that is. The girls are a different matter. They come in three categories: "got her man," "hasn't got him," and "I'm gonna be a career girl."

Each of these types has a very distinctive plummage and modis operandi. Take the "got her man type" for example. This girl has that casual, sloppy appearance accented by a snug, all-knowing, all-satisfied smile that radiates, "See I got a college education and a husband." She's filled with talk of June weddings, bridesmaids, homes, children, bridal gowns, how to boil water without burning the pan, how to buy food, like rice, by the grain, round, or box. Her last semester she is barely studying, just so she can pass you know.

Then we come across the desperate "I haven't got him yet" type. You can spot her a mile away. She's impeccably dressed, manicured, combed, and perfumed at all times. She tells the lat-

est jokes, smiles pleasantly, and always seems to be where the boys are. She tries to be fascinating and sexy at the same time without appearing obvious. Poor kid, she's working against time since surveys show that the day she gets her diploma her chances of getting a man drop 95 per cent, and she's only got two more months. No wonder she's a nervous wreck. She is at this point, something akin to a squirrel who has forgotten where he has hidden his winter supply of food.

Of course there is the girl who is going to have a career and an apartment complete with cat and rocking chair. She doesn't want a home and family; she wants to be her own boss. After all, children bore her, and cooking and housekeeping are a drag. And as for being the loving wife, forget it, the only person she loves is herself. You can spot her on a bright sunny day with her nose buried in some technical journal, tuning up on the latest trends in the trade or scanning a map for the best job locations. She's always dressed with a casual well-dressed flair and her smile is one of superiority and confidence. She looks down on her friends who are in the middle of a myriad of wedding plans with that condescending air of a mother watching her children at play. She can't really understand how the silly dears can be so eager to waste their lives as household drudges. Hee hee, she'll find out

soon enough that unless she has a motherly roommate she's headed for a mop and pail, though single. Those apartments do get dirty you know.

Weil it's plain to see what the last semester of ivy and tradition means to the girls. The men have their plans too, aside from those last beer blasts and all night poker sessions.

Strange as it seems they pretty much parallel the girls' situation at this time of year. For instance, there's the guy our happy "she's got her man" coed is about to marry. She doesn't realize it yet but her dreams of being a common house frau don't exactly coincide with her loved one's. He envisions her as an efficient working wife either putting him through graduate school or helping feather the nest with luxuries. Dream on little coed. Your day of

rude awakening is about to arrive.

Then there's the guy who hasn't got his gal. He's equally desperate as the girl who hasn't got a man. All his friends are taking the big step and he doesn't want to be left out. He's afraid if he doesn't grab something now he'll never have such a selection to choose again. Perhaps these desperate people could meet at the Grill for a nostalgic ridden coke and solve their mutual problem.

Last but not least there's our bachelor type who sees himself as a personification of the rich playboy with hundreds of women falling at his feet. We hate to disillusion him, but unlike our career girl, his life can't revolve around a cat and rocking chair when he grows old and fat and

bald. But then his vow to remain free from woman's trapping skills isn't going to last long anyway. From the number of bachelors running around you can plainly see he's doomed to home and hearth. The only words of wisdom we have for this creature is reap ye fun whilst ye may. You haven't got long, buster.

Is Tropic Star for you?

College girls seem to know what they want. We get a lot of ideas about ring styling from American campuses. If there is such a thing as a consensus, it would sound like this: conservative styling, with a difference.

That's what we've designed into Tropic Star...the newest of the beautiful Artcarved diamond engagement rings. Like all Artcarved rings, it's styled for lasting beauty...guaranteed in writing for permanent value. Is Artcarved's beautiful new Tropic Star for you? See for yourself.

Three Important Issues

The University's Board of Trustees will be confronted with three important issues which need immediate attention when it meets this afternoon.

The most important issue demanding the board's attention will concern the University presidency. The presidential screening committee has worked long during recent months to find qualified candidates to succeed President Frank Dickey.

There have been reports that the committee now believes it has found a candidate possessing the necessary qualifications to head the University. There are also reports that the board is still looking. We hope this problem can be solved soon and that two other pressing matters can be met.

The question of integrated athletics at the University certainly merits the board's attention. The issue was initiated by a *Kernel* editorial March 22. Various reasons have been given why such action at this time would not be feasible. The issue, however, is not to be decided by University officials but any action can only come from the board. If anything is to be done toward integrating of our athletic teams, the initiative will have to come from the board. If it remains more feasible for the University to consider its financial rather than ethical obligations, this should be so stated. Presently, only lip service is being paid to this problem. It

is the responsibility of the board to indicate the University's position on the issue.

The third issue, one which has been left unattended since September, concerns the distribution of pacifist handbills by Dr. Abby Marlatt and Mr. Edward Morin, both of the University faculty. Whether the two teachers violated their academic responsibility in distributing the handbills at six local churches was to be investigated by a special committee appointed by Gov. Combs at the September meeting.

Thus far, the committee chairman, Superintendent of Public Instruction Wendell Butler, has not even called a meeting of the three-man committee. If any investigation of the handbill case has been conducted, such findings should be reported to the board.

Behind the scenes agreements to probe the case no further for fear of smudging a clouded University image is not where the issue should be left.

We feel each of these three issues are worthy of the board's attention this afternoon. We are not making any accusations that the board has or will duck any of these issues. What we argue is that it is to the advantage of the University that they receive public hearings rather than be prolonged or shelved for future meetings.

A Job Well Done

In the 19th century John Henry Newman expressed the idea of "knowledge for its own sake" in his "Idea of a University."

Things have changed since the 19th century, however. Today we face world-wide problems of over-population, harnessing the potential of nuclear power, and developing the potential of underdeveloped countries.

Here at home we face problems of slum clearance, raising unemployment, and integration. In Kentucky we face problems of inadequate prison facilities, flood control, raising academic standards, and reapportionment.

The reapportionment problem was recently solved to some extent, thanks to the work of two University political science professors, Jack Reeves and Malcolm Jewell.

More work is going to have to be done in reapportioning the state, because of political maneuvering, not poor plans submitted by the two UK professors.

Dr. Jewell, acting head of the Political Science Department, is not overjoyed with the results of his plan, but admits that it "conforms to the political realities of the state."

Prof. Reeves' redistricting plan for

the house was "92 percent accepted" he thinks.

This is not the first time that Dr. Jewell or Prof. Reeves has attempted to aid this state. Dr. Jewell drew up a redistricting plan for the state's congressional districts last year.

Mr. Reeves has a long history of service to Kentucky. Since 1941 he has worked extensively with the state and other organizations to attempt to better Kentucky.

He has worked with the Department of Finance and the Legislative Research Commission. In 1946-47 he campaigned for a Constitutional Convention and in 1960 he was head of the sixth district's Constitutional Convention campaign. From 1948 to 1950 Mr. Reeves was a leader in advocating a state sales tax and in the 1950's he worked to improve local election proceedings.

In October of 1961 he sent letters to all political candidates in the state urging redistricting of Kentucky. This was before the Supreme Court handed down its ruling in *Baker v. Carr* allowing the courts to redistrict if the states did not do the job.

Even though Dr. Jewell's plan was not accepted as he had hoped, we hope that it will not deter other University faculty members from aiding their fellow citizens by participating in other necessary projects.

LETTERS TO THE EDITOR

Get With Us, Mr. Shively

The stand the *Kernel* has taken on integrated inter-collegiate athletics at UK has brought comment far and wide. It was to be expected that not all of this reaction would be favorable. C. P. Rawls of Memphis, Tenn., in his letter in the March 28 *Kernel* presents a typical racist reply. Actually this diatribe was rather mild.

Mr. Rawls does ask one important and intelligent question, although it is debatable if he meant it as such. He asks what we would like to become leaders in. We think the answer is obvious. We would like to become leaders in an honorable South. This term was unfortunately used in a derogatory sense in another letter in the same issue. We like to think we at UK intend to take the lead in restoring the dignity of a truly honorable South. We would like to show that we are true Southern gentlemen, deserving of respect and admiration. Every section of the country has its less desirable elements. It is the shame of the South that this more rabid element has become emblematic in the public consciousness. It is time for those of us who regret this image to stand up and be counted. We would like to show that Mr. Rawls and his ilk do not represent the whole South.

Contrary to Mr. Rawls' suggestion, we do not need "a few thousand soldiers and marshals to help out" at UK. Our pressure for change is coming from within. That is where it should be. We have no desire for publicity for personal gain as Mr. Rawls insinuates. We only wish to show that we are serious in our desire to become a truly great university. We certainly do not wish to obtain a reputation such as that which has been forced on Ole Miss.

To the credit of our students and our state the majority reaction to the *Kernel's* stand has been favorable. But now let us have action rather than words. Come on, Mr. Shively, get with us. Even if our prestige goes down in the SEC it will increase immeasurably in the nation.

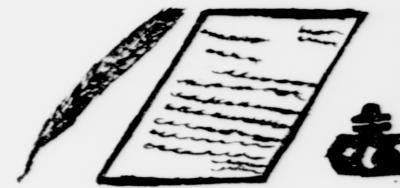

FRANK B. RIPPETOE
A&S Senior

Frustrating Years

To The Editor:

Urging the University of Kentucky to introduce Negroes into its athletic teams is likely to win for you some personal "prestige" and notoriety, especially in the *Time*, Inc., magazines, New York, Atlanta and certain other newspapers. The adoption of such a program by the University could, as your editorial suggests, gain "prestige" for it in certain circles. Perhaps, as a matter of fact, University of Kentucky athletic squads might even improve their records in varsity competition, with the addition of Negroes.

The latter assumption leads me to believe that your integration policy may be the result of frustration as much as an anti-Southern stand. University of Kentucky teams have not done well in Southeastern Conference competition in recent years. Of course, the addition of Negroes to the athletic programs is no guarantee of victories, either. Search the records of the teams of many Northern universities and you will discover I think

that many losing teams were sprinkled with Negro players.

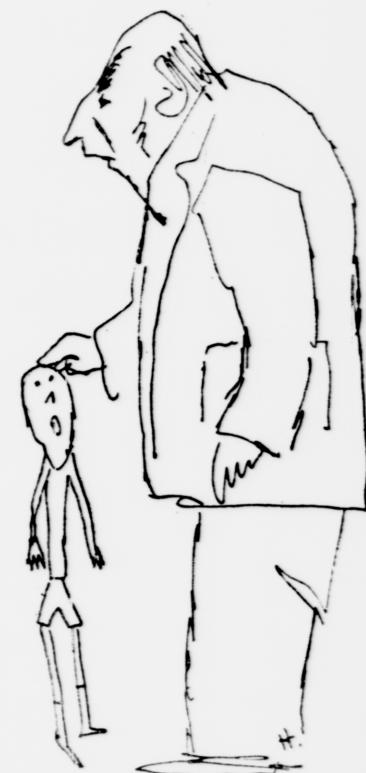

By all means, withdraw from the Southeastern Conference. As a companion suggestion, you might find your University, and certainly your ideas, in more acceptable company with a conference made up of the Universities of Dayton, Detroit, Buffalo, Rochester, Syracuse and Toledo. Then behind you will be those "frustrating" years of being beaten by those big white segregated brutes from Ole Miss and Mississippi State Universities, LSU and Alabama.

F. J. LEWIS
New York, N. Y.

Break Down The Barriers

To The Editor:

I read with some interest an Associated Press dispatch which summarized your recent stand on segregation and the SEC. I am a graduate of an SEC school, the University of Florida, and while I commend your forthrightness, I question the wisdom of your proposal. I assume that your editorial policy alone will not impel the University to a particular course of action, but hopefully assuming the maximum in influence, would it not be better to try to break down the barriers at Kentucky and to con-

tribute to their erosion in the deep South? This can be hoped for only if Kentucky stays in the SEC, and puts the burden of bigotry more squarely on the other schools. The few press dispatches that I have seen here indicate that Florida and Miami (not an SEC member) are showing signs of relenting. And certainly Georgia and Georgia Tech, and perhaps Vanderbilt and Tulane, offer some possibility in breaching the race barrier. Certainly all of this is highly speculative, but the possibilities are much broader if Kentucky stays in than if Kentucky pulls out.

CLIFF G. COFFEEN
Phoenix, Arizona

Editor's Note: Mr. Coffeen's suggestions were expressed in the *Kernel* editorial of March 27.

Indonesia Benefits From UK Help

By ROYCE TAYLOR
Kernel Feature Writer

Did you know that water buffalo are sometimes afflicted with leprosy? This discovery was made recently in Indonesia by U.S. and Indonesian scientists doing research under the supervision of the Office of Overseas Programs of the Kentucky Research Foundation.

In 1956, three formidable tasks were undertaken in Indonesia by teams of American educators operating under the direction of the Office of Overseas Programs. These are objectives of the operation:

1. Rebuild the native faculties of the Institute of Technology at Bandung and the Agriculture and Veterinary schools of the University of Indonesia at Bogor.

2. Initiate local research projects by native faculty members and graduate students while their schools are being reestablished.

3. Develop extension services for the University of Indonesia to assist in the growth of the country.

The University was awarded the contract for this project by the U.S. State Department's Agency for International De-

velopment. The selection of the University was made by a team of Indonesian officials after they had visited many other American universities.

The necessity for rebuilding the faculties of the Institute of Technology at Bandung and the Agriculture and Veterinary schools of the University of Indonesia at Bogor developed because most of the Dutch instructors at these schools were invited to leave Indonesia when it gained its independence. The task of providing qualified instructors at these colleges is being accomplished by bringing Indonesian graduate students to the United States for advanced study and by sending U.S. professors to Indonesia to train graduates there.

Initially this phase of the program involved only Indonesian graduate students and U.S. professors in the Engineering fields, but was expanded to include nearly all technical or skilled professions. Nearly half of the students participating in this program attend UK and about half of the American professors teaching in Indonesia have been recruited from the University.

The original campus of the Engineering Faculty, Institute of Technology, Bandung, Indonesia. The buildings are of a distinctive Sumatran style of architecture. The large structure at the left houses

the Student Union and library and those to the right contain classrooms and laboratories of the Civil Engineering Dept.

Research Difficult; Facilities Inadequate

Efforts to initiate research projects by the faculty and graduate students at Bandung and Bogor have not been quite as successful as the faculty training program. However, considerable progress has been made. Reports concerning UK's operations in Indonesia prepared by Dr. Jansen and Dr. Merle Baker, Executive Director, Kentucky Research Foundation, cite lack of laboratory facilities and shortage of Indonesian funds as primary difficulties facing UK contact team members working with researchers at the Indonesian schools. The U.S. government is providing some assistance and much is being done through the determined efforts and ingenuity of the U.S. professors and their Indonesian counterparts.

Dr. Lee Gildart, on leave of absence from UK, has helped build a complete Solid State Physics laboratory using an old bomb shelter and salvage material. This facility has been completely air conditioned and has been subdivided to provide 25 small laboratories.

The Agency for International Developments has provided aid for the research endeavor by supplying reference material.

Books collected at UK and in Lexington have been used to build a 30,000 volume student library. Texts have been provided by other funds. The significance of this library can be appreciated when it is realized that the cost of one text is equivalent to three months subsistence for an Indonesian student attending the Indonesian schools.

In spite of the handicaps being encountered, numerous research projects are being conducted by Indonesian faculty members and graduate students.

Indonesians Train In U.S.

This research ranges from investigations into the proper diet for poultry in Indonesia to inquiries in the field of meteorology. Several papers resulting from these studies are to be published in the U.S. and in Indonesia. One paper concerning diseases of domestic animals of Indonesia was published at UK last month.

One of the early participants in the faculty training project is now Indonesia's Minister of Higher Education. Three others have earned the Ph.D. degree.

As this part of the program reaches the halfway point, 260 Indonesian graduate students have been trained in the U.S. and about 260 more are scheduled to receive advanced training in U.S. colleges and universities.

A portion of the library of the Agronomy Department of the University of Indonesia at Bogor. Many of the books in this library were provided by UK and the residents of Lexington.

Extension Services Next Team Project

The third task of the Office of Overseas Programs, that of establishing extension services at the Indonesian universities, is just beginning. Work in this area was deferred pending partial completion of the native faculty training program and establishment of significant research programs. The first major effort to create the extension services of the Indonesian schools will begin this month with the arrival of two Indonesian officials at UK. These officials will spend three months here for the purpose of studying all aspects of UK's extension programs.

The advances made by American educators and their Indonesian counterparts in rebuilding Indonesia's higher education system have not been achieved without difficulty and frustration. At one time or another, shortage of funds, lack of transportation, inadequate housing, concern for welfare of students and some impatience have plagued the per-

sons concerned with the program. The mission is being accomplished in spite of these handicaps and irritations. At the beginning of the project, only six U.S. professors were involved. This number increased to forty-four at one time and is now declining as the Indonesians increase their capability to staff their universities with their own faculties.

All participants in the project have been commended for their accomplishments by Dr. Jansen and Dr. Baker in their officials' reports covering the past five years of the operation of the Office of Overseas Programs.

Cats Whip Vandy; Sophomores Star

By WALLY PAGAN, Kernel Daily Sports Editor

Kentucky's baseball Wildcats got the season started with a bang with its sophomores providing the winning punch over Vanderbilt 2-1 and 4-3 over the weekend at the Sportscenter.

The Cats had to really near the end of both games to insure its first two SEC wins. Vanderbilt took its sixth and seventh losses at the hands of the Cats.

In Friday's game, sophomore second baseman, Tuffy Horne, smashed a double to deep right field to score pinch-runner Butch Gibbs for the winning run in the bottom of the ninth.

Kentucky took a 3-2 edge into the ninth, but Vandy's Carl Childress go into one of Bob Grudnitski's pitches and drove it over the left field fence to knot the score.

Vandy then proceeded to load the bases on the tiring Grudnitski, and Bob Farrell was called to relieve the UK starter.

With the score tied, the bases loaded, and one out in the ninth, Farrell got Terry Gescheke to strike out and Elliott Hembree to pop to short to end the inning.

With one out in the bottom of the ninth, catcher Larry Griffin walked then advanced to second as pitcher Bunny Richardson threw Farrell's bunted ball wild into centerfield.

Gibbs then came in to run for Griffin, and Horne belted a solid liner over the right fielder's head to knock in the winning run. Farrell got the credit for the win.

In Saturday's contest, sophomore third baseman Randy Embry clouted a home run to give the Cats a 2-1 victory in the rain abbreviated game.

Embry's blast came in the bottom of the fifth inning and a few minutes later a downpour washed out the remainder of the game.

Our Hero!

Tuffy Horne is congratulated by teammate Charlie Casper after knocking in game-winning run.

Heyman Paces East Win

Art Heyman, the much honored All-American from Duke University led the East to a 77-70 victory over the West in the College All-Star game at Memorial Coliseum.

Heyman turned in a great second half performance to produce points when the East was in the hole and earned the "Star of Stars" award.

A crowd of 9,000 saw Heyman take command in the second half to lead an East rally to overtake a battling West team.

The game was called a huge success by Ken Anzle, publicity chairman, and said that coaches have no doubt it will be held in Lexington in 1964.

Many basketball men have described this year's game as the perfect college all-star game ever held. Basketball experts said they were very pleased with the showing and the fans showed great enthusiasm.

The fans showed particular interest in Duke's Art Heyman who was named most valuable player in the game, but it was towering Nate Thurmond from Bowling Green who really had the fans talking.

Thurmond, a 6-11 pivot man, put on a one-man defense show in the game to help the East capture the win.

East coach, Harold Anderson who coached Thurmond in college said before the game that he feared the West's height advantage might be the downfall of his East team.

But Thurmond took charge at the opening tipoff and spent the evening guarding the basket with great defensive moves. So effective was he in the first half that the West was able to hit only 34 percent of its field goal attempts.

Tom Thacker of Cincinnati, a comparatively short 6-2, led both teams in rebounding with 13. Thurmond had 12.

On numerous occasions the West looked like it had an easy basket, but the big hands and long arms of Thurmond were often in the way.

Thurmond's defensive brilliance, combined with Heyman's clutch playing, spelled the difference in the contest sponsored by the National Association of basketball coaches.

Gary Hill, an unsung performer from Oklahoma City University, shut Heyman down in the first half, allowing him only two points. But in the second half, Heyman solved the defensive problem and sparked the heavily favored East team from behind.

Hill was the game's leading scorer with 18 points, picked up

nine of 13 field goal attempts. Heyman lead the East with 14.

Does a man really take unfair advantage of women when he uses Mennen Skin Bracer?

All depends on why he uses it.

Most men simply think Mennen-Iced Skin Bracer is the best after-shave lotion around. Because it cools rather than burns. Because it helps heal shaving nicks and scrapes. Because it helps prevent blemishes.

So who can blame them if Bracer's crisp, long-lasting aroma just happens to affect women so remarkably?

Of course, some men may use Mennen Skin Bracer because of this effect.

How intelligent!

McKay Raps Big 10, Pros

DALLAS (AP)—John McKay, coach of the national champion Southern California football team, thinks pro football is more stereotyped than the college game.

And he says he's sick and tired of hearing that Big 10 Conference teams are superior to those of the West Coast.

McKay, in Dallas to lecture at a football clinic, had some other pertinent observations. One was that his 1963 Trojans would be better physically than the 1962 team.

Of the 38 men who played for Southern California, 30 return, including flying halfback Willie Brown and star end Hal Bledsoe, who got all sorts of All-America acclaim.

"We're going to be better physically," McKay prophesied. "That doesn't mean we'll do as well. (The '62 Trojans were unbeaten and untied and won the Rose Bowl.) We play Colorado, Oklahoma, Michigan State, Notre Dame and Ohio State in the first five games. We might have a new coach after that fifth one."

"I think pro football is more stereotyped than college football. I can't tell one pro team from another."

Wildcats Defeat Eastern Maroons

Kentucky's Wildcats posted its third straight win of the season yesterday as they downed the Eastern Maroons 6-1 at the Sportscenter field.

The Wildcats busted loose for five runs in the fourth inning to ice the victory.

Dave Quick started the game for the Maroons but was relieved in the fourth when the Wildcats unleashed its attack. The Cats bunched together hits along with five walks in the inning to score the runs. Ron Kenney had a solo home run for Kentucky in the sixth.

Rex Radcliffe picked up the win in going all the way. Eastern got its only run in the first inning on a triple and a sacrifice fly.

The Cats go against Centre in a doubleheader today with Cotton Nash and Ken Lewis taking over the mound chores.

JOHN MCKAY

California stopped the streak, 7-0, over Wisconsin. Then the Big 10 won six more in a row. Coast teams have won three of the last four.

"USC has won more Rose Bowl games than anybody—10 (against three losses)," McKay declared. "Woody Hayes (Ohio State coach) has scored one touchdown the last three years he has played on the Coast."

Golfers Whip Xavier; Bellarmine Next Foe

The University of Kentucky golf team successfully opened its 1963 campaign by routing Xavier University, 21-6, on the Tates Creek Country Club course.

Coach Dave Butler's charges swept five of six individual events and won two of three team matches in taking the impressive victory.

UK senior Don Heilman took medalist honors by traversing the course in an even par 71. Junior Chuck Kirk was next in line as he fired a two over par 73.

Butler said he was well pleased with the scores and the play of his team. "It was especially good for the first match and the terribly windy weather."

He also added that the expected

play of Don Rogers was greatly missed, but he should be back by Friday.

Kentucky will now face Bellarmine away. Joe Lally is Bellarmine's top man, and Butler anticipates a good match between him and Heilman. Butler added that Bellarmine usually has good overall strength.

The Cats' next home match will match them against Bowling Green of Ohio. The Kentucky team fell to the Buckeyes last year and will be seeking revenge Friday at Tates Creek.

The Itinerary

June 26 NEW YORK. Sail on **SS GROOTE BEER.** **July 4 NEW YORK.** Leave by Sabena Boeing Intercontinental Jet flight.

July 5 AMSTERDAM. Arrive by air. Day at leisure.

July 5—GRAND HOLLAND TOUR. Dock at Rotterdam and be chauffeured in your chartered motorcoach to the Hague and through the Dutch countryside to Amsterdam.

July 6—AMSTERDAM. A drive through the city, climaxed by a visit to the Rijksmuseum. Afternoon, cruise the canals.

July 7—AMSTERDAM. Full day at leisure. (Air passengers make Grand Holland Tour.) Leave by overnight steamer to London.

July 8-11—LONDON. All that is London is yours. Center of a Commonwealth of countries spread over the face of the earth, nothing lacks to entertain and amuse, educate and enlighten, fascinate and illuminate the mind. Buckingham Palace and St. James' Palace (changing of the Guard); House of Parliament with Big Ben, Westminster Abbey, St. Paul's Cathedral, Tower of London, British Museum, West End theaters and shopping streets. Solo with colorful shops and restaurants, the artists' quarters in Chelsea, STRATFORD. Full day excursion up the Thames via Eton, Maidenhead and Henley to Oxford. Visit the famed University, then continue to Shakespeare's town; see the Shattuck, Ann Hathaway's cottage, the birthplace of the Bard and the Memorial Theater. Time to attend a performance there (optional) before returning to London. Full day at leisure in London; depart by overnight steamer to Germany.

July 12—COLOGNE-BONN. Arrive in the morning by train in Cologne. Your motorcoach awaits at the station and you board for a tour of the city with its magnificent cathedral before proceeding to Bonn. In the Capital of the New Germany see the government buildings, University and Beethoven's House.

July 13—RHINE JOURNEY. A leisurely steamer cruise up the Rhine past the rock of the Lorelei. Disembark and continue in your motorcoach through Frankfurt, sophisticated metropolis, to Old Heidelberg. Night at the Red Ox.

July 14—HEIDELBERG-MUNICH. Visit the oldest university town in Germany, nestled in the valley of the Neckar. Ride the funicular up to the castle. Afternoon drive by Autobahn to Munich.

July 15—MUNICH. A fascinating mixture of old and new, the old Pinakothek, Konzilspalast, Frauenkirche, the new House of Art, and the Hofbrauhaus. Leisure time.

July 16—INNSBRUCK. Morning drive through the heart of the Bavarian Alps to Innsbruck, home of the Little Golden Roof—and Leopoldskron. Free time.

July 17—INNSBRUCK-LUCERNE. Through Landeck and the Arlberg to the Principality of Liechtenstein and its capital, Vaduz. Then Switzerland's charming eastern provinces and Lucerne.

July 18—LUCERNE. Morning drive in town to see medieval wooden bridges, the famous Lion Monument, and the charming lakeshore. In the afternoon, an excursion by lake steamer and mountain railway to the summit of Mt. Pilatus for a splendid panorama of Lake Lucerne and the Swiss Alps. Free time.

July 19—THE MOUNTAIN WONDERLAND. Over the Bernese Oberland to Berne, capital of Switzerland for a short tour to include the Clock Tower and Bear Pit, Past Lake Thun to Interlaken nestled at the foot of the glittering Jungfrau, Lake Brienz and up past thundering waterfalls to the Grimsel Pass; descend to Gletsch and then up again to the Furka Pass (8000 feet). A stop is made to look in the ice caves in the gigantic Rhone glacier. Descend via Andermatt and along the Axenstrasse to Lucerne.

July 20—LUGANO. Morning drive over the St. Gotthard Pass into the beautiful Alpine Lake District and lovely Lugano, on the Swiss side of the lake. Free time for a swim or a sail in the afternoon.

July 21—MILAN-VENICE. First stop in Italy is Milan to see the cathedral, and Santa Maria delle Grazie with Leonardo's "Last Supper." Then down the broad Po Valley past Lake Garda, through Verona, Vicenza and Padua to Venice.

July 22—VENICE. In this charming city called the Pearl of the Adriatic, stroll around St. Mark's Square, visit the Palace of the Doges, St. Mark's Cathedral, see the Bridge of Sighs and the towering Campanile. Gondola serenade in the evening.

July 23—FLORENCE. Drive over the picturesque mountain road crossing the chain of the Apennines to glorious Florence.

July 24—FLORENCE. City of the Renaissance, itself a museum. Giotto's Campanile, The Duomo, Palazzo Vecchio, Uffizi and Pitti Galleries.

July 25—THE HILL TOWNS. Perugia, where the treasures of many centuries are on display; Assisi, town of St. Francis, where the never-to-be-forgotten frescoes of Giotto are on display. Arrive in the Eternal City, Rome.

July 26-28—ROME. Three full days in the Eternal City. Visit all of ancient and modern Rome; the Vatican, St. Peter's, Sistine Chapel, Colosseum, Forum and the Appian Way. The fountains, Palaces and the fashionable Via Veneto. One day at leisure. Depart by sleeper for the Riviera.

July 29-31—FRENCH RIVIERA. Nice is our headquarters on the playground of the Continent. A full day drive will take us over the Grande Corniche Drive to Eze, La Turbie and Menton. Visit Monaco, tiny realm of Prince Rainier and Princess Grace. Free time for sunning, swimming, sailing or a private trip to St. Tropez or perhaps Picasso's Villa La Californie (optional). Depart by sleeper for Paris.

Aug. 1-4—PARIS. Intellectual and artistic center of the western world for many centuries, the richness of its heritage makes it today one of the most rewarding cities. Ancient and modern Paris will be visited including Montmartre and the Latin Quarter, Notre Dame and the Sorbonne, Champs Elysees, Arch of Triumph and Eiffel Tower. Full day excursion to Chartres with the most wonderful Gothic cathedral in all France, and the Fabulous Palace of Louis XIV and Marie Antoinette at Versailles. Full day excursion to the charming Chateau Country; visit the Chateaux of Blois, Amboise and Chenonceaux, the Loire Valley. Full day at leisure.

Aug. 5—BRUSSELS. By morning train through the northern provinces of France and Flanders to Brussels. Afternoon visit the Grand Place, St. Gudule Church, Mannekin Fountain and Royal Palace. Leisure time. GALA FAREWELL BANQUET.

Aug. 6—BRUSSELS-ROTTERDAM. By train in the morning. Sail in the afternoon for New York on the SS GROOTE BEER. Passengers returning by air depart from Brussels arriving in NEW YORK the same day.

Aug. 15—NEW YORK. Arrive by Ship.

TOUR PRICES INCLUDE:

TRANSATLANTIC TRANSPORTATION: Jet Economy Air. Accommodations on Dutch Student Ships at minimum rates. Better accommodations may be provided on request or at the option of the Steamship Co. In either case, participants will be billed the actual tariff difference.

EUROPEAN TRANSPORTATION: By Deluxe pullman-type motorcoach with reclining seats and forced-air ventilation. Second class rail, river and channel steamers. Regular local coach service and tourist class air. For overnight journeys sleeping berths will be provided. Minimum rate cruise accommodations are included on The Continental Tour and better accommodations may be provided on request or at the option of the steamship companies. In either case participants will be billed the actual tariff difference.

HOTELS: Accommodations consisting mainly of twin bedded rooms with hot and cold running water at good comfortable European style hotels and pensions and in some cases university residence halls of superior quality. Bathrooms will be available on each floor and in most cases European hotels make a nominal charge for baths.

MEALS: Three meals daily consisting of continental breakfast (full breakfast in British Isles according to the custom of the country and table d'hôte lunch and dinner. Menus featuring local specialties will be featured and there will be gala dinners as per itinerary. Some box lunches will be provided. In London, Paris and Rome lunch is omitted to permit greater freedom of movement.

SIGHTSEEING: As described in the itinerary by motorcoach, on foot or by gondola. Local English speaking guides will accompany the group for sightseeing visits and all admission fees are included.

SPECIAL FEATURES: As described in the folder are included.

TOUR LEADER: An experienced responsible tour leader will be assigned to the group for the entire stay in Europe to take charge of all operational matters and look after the well-being of the participants.

OPERATION: Departure of all tours is guaranteed.

WILCO TRAVEL AGENCY, Inc.

5041½ Euclid Ave. Lexington, Ky.

Sore feet and a trophy were the harvests reaped by Triangle's Don Beddow and Bill Kohout of FarmHouse.

The hikers finished first and second respectively, both with times barely over 11 hours in the interfraternity

50-mile hike sponsored by Alpha Tau Omega.

11 Finish 50-Mile Hike

Eleven tired men walked—in some cases hobbled—to the Coliseum Saturday to complete the interfraternity 50-mile walk.

Don Beddow, the eventual winner, came in with a time of 11 hours and 10 minutes, which is not far from a record, said Jim Dockter of Alpha Tau Omega, sponsors of the event. Dockter said the times were especially impressive because the hikers took breaks on their own time rather than having scheduled time outs.

The finishers and their times are:

Don Beddow, Triangle, 11:10; Bill Kohout, Farmhouse, 11:17; Sam Houston, Triangle, 12:02; Henry Hornbeck, Triangle, 12:40;

Bob Lynch, Triangle, 12:50; Kent Taylor, Sigma Nu, 12:59; Bill Rea, Kappa Alpha, 12:59; Larry Cashen, Sigma Phi Epsilon, 13:35; Dave Early, Sigma Phi Epsilon, 13:35; Dewey Clay, Farmhouse, 14:55, and Otis Griffin, Farmhouse, 14:55.

The engineers of Triangle led most of the race, except for the

20-30 mile midpoint, during which the pace was set by Alpha Tau Omega's Jim Dockter.

The race began at the Coliseum at 11 p.m. Friday, with a round trip to Frankfort, returning to the Coliseum Saturday. Each of the finishers received a plaque with a trophy going to the winner.

A Short Walk from UK

Assignment: build the "grease gun" into our cars

We went to the mountain to make 1963 Ford-built cars go 30,000 to 100,000 miles between major chassis lubrications

Quite a task faced Ford Motor Company engineers when they set out to eliminate the traditional trip to the grease rack every 1,000 miles.

Like Mohammed, they went to the mountain—Bartlett Mountain on the Continental Divide in Colorado. More molybdenite is mined there than in the rest of the world combined. And from molybdenite ore comes the amazing "moly" grease that helps extend the chassis lubrication intervals for Ford-built cars. This grease sticks tenaciously to metal, stands up under extreme pressures and resists moisture, pounding and squeezing. It is slicker than skates on ice!

New, improved seals were developed. Bushings, bearings and washers of many materials were investigated. Slippery synthetics, like nylon and teflon, were used a number of new ways.

The search for means to extend chassis lubrication also led to New Orleans—where experimental suspension ball joints tested in taxicabs in regular service went two years without relubrication.

It took time. And ingenuity. But the effort paid off when Ford-built cars were the first to build in chassis lubrication good for 30,000 miles or two years—which ever came first.

Another assignment completed—another "Ford First" and another example of how Ford Motor Company provides engineering leadership for the American Road.
